UNLEthics

The University of  
Nebraska-Lincoln is an  
equal opportunity  
educator and employer.

Few changes in the demographics of higher education in the United States have been as dramatic as the increasing role of women. Yet, there remains a great deal of variation in the representation of women by discipline. Of particular concern is the paucity of women in STEM fields at research universities. We will consider the importance of building a diverse faculty and student body in STEM fields, identify existing challenges and ways that we might go about bringing women into STEM fields, and discuss the possible importance of interdisciplinary research teams for solving some of the world's most vexing problems.

Please, if you'd like a **free lunch**, **RSVP** via email at [ethics@unl.edu](mailto:ethics@unl.edu) by 1:00 pm, **March 29<sup>th</sup>**. Indicate dietary restrictions. Also, feel free to bring a lunch or just enjoy the conversation.
